PROJECT OVERVIEW

This project will restore the physical habitat to 5,000 linear feet of the river, reforest it, and will recreate and restore about 200 acres of parkland with 30 acres of wetland. On site, there are also 3,000 linear feet of headwater streams. This project is made possible by Clean Ohio Greenspace, NPAA, Great Lakes Commission, Ohio Lake Erie Commission, GLRI, and others administered by the Summit Metro Parks.

The AOC has specific targets to meet before it is taken off the list of impaired waters, or “delisted” as outlined by the Great Lakes Water Quality Agreement (GLWQA). The Advisory Committee developed a plan to identify and rectify the Beneficial Use Impairments (BUIs) to categorize criteria for restoration and create benchmarks toward achieving the goals of delisting.

Learn more about the status of the Cuyahoga River AOC Management Action progress and current state of the delisting efforts at www.cuyahogaoc.org.
