PROJECT OVERVIEW

With the removal of the Canal Diversion Dam, the Dam pool stretching for a couple miles upstream is in need of restoration. This project will help reestablish the habitat upstream from this effort and will create a higher water quality aligned with the effort.

The AOC has specific targets to meet before it is taken off the list of impaired waters, or “delisted” as outlined by the Great Lakes Water Quality Agreement (GLWQA). The Advisory Committee developed a plan to identify and rectify the Beneficial Use Impairments (BUIs) to categorize criteria for restoration and create benchmarks toward achieving the goals of delisting.

Learn more about the status of the Cuyahoga River AOC Management Action progress and current state of the delisting efforts at www.cuyahogaoc.org.
