# MEMORIAL PARKWAY

*City of Akron- Little Cuyahoga River*

*HUC12 #: 041100020304*

## PROJECT OVERVIEW

The Memorial Parkway Restoration will be the removal of the Fish Passage Barrier that still resides in this stretch of the City of Akron. It will boost the water quality as well as help move the needle on BUIs 3a (fish population), 6 (benthic macroinvertebrates), and 14a (fish habitat).

The AOC has specific targets to meet before it is taken off the list of impaired waters, or "delisted" as outlined by the Great Lakes Water Quality Agreement (GLWQA). The Advisory Committee developed a plan to identify and rectify the Beneficial Use Impairments (BUIs) to categorize criteria for restoration and create benchmarks toward achieving the goals of delisting.

Learn more about the status of the Cuyahoga River AOC Management Action progress and current state of the delisting efforts at [www.cuyahogaoc.org](http://www.cuyahogaoc.org).
