SOWINSKI PARK WETLAND OXBOW AND STREAM RESTORATION

Doan Brook HUC12 #: 041100030504

PROJECT OVERVIEW

This project will target a 600-foot linear stretch of the Doan Brook that flows through Sowinski Park, which is situated within the historic Rockefeller Park and Cultural Gardens. This proposed project retains historic stream walls that can remain with in-stream modifications to improve habitat, replaces failing wall segments with natural streambank armoring, and creates an oxbow wetland to reduce turbidity and sediment loads.

The AOC has specific targets to meet before it is taken off the list of impaired waters, or “delisted” as outlined by the Great Lakes Water Quality Agreement (GLWQA).

The Advisory Committee developed a plan to identify and rectify the Beneficial Use Impairments (BUIs) to categorize criteria for restoration and create benchmarks toward achieving the goals of delisting.

Learn more about the status of the Cuyahoga River AOC Management Action progress and current state of the delisting efforts at www.cuyahogaoc.org.
